NEW YORK STATE

1990 CENSUS COUNTS FOR COUNTIES, CITIES, TOWNS AND VILLAGES

The attached contains 1990 Census counts recently released by the Census Bureau for all New York State governmental units. The 1990 figures presented are subject to possible correction for undercount or overcount. The attached letter from the Director of the Census Bureau further explains the use and limitations of these figures.

The 1990 populations are presented with the 1980 final counts for comparison. It should be noted that only total populations are shown for local governments which are split by higher levels (County or Town). Villages split by a town boundary are listed immediately after the county figures; villages split by county boundaries are listed at the end of the report. Similarly, all indian reservations are listed as total counts at the end of the report.

Note: The Population figures for July 1, 1982 to 1988 are estimates prepared by the U.S. Bureau of the Census, based upon 1980 Census data. Due to the estimating methodology the difference between 1988 and 1990 may not be directly comparable. Therefore caution should be used when examining the change between the intercensual figures and the 1990 decennial population. This is particularly true for small population areas.

Note: The Population figures for July 1, 1982 to 1988 are estimates prepared by the U.S. Bureau of the Census, based upon 1980 Census data. Due to the estimating methodology the difference between 1988 and 1990 may not be directly comparable. Therefore caution should be used when examining the change between the intercensual figures and the 1990 decennial population. This is particularly true for small population areas.

Note: The Population figures for July 1, 1982 to 1988 are estimates prepared by the U.S. Bureau of the Census, based upon 1980 Census data. Due to the estimating methodology the difference between 1988 and 1990 may not be directly comparable. Therefore caution should be used when examining the change between the intercensual figures and the 1990 decennial population. This is particularly true for small population areas.

Note: The Population figures for July 1, 1982 to 1988 are estimates prepared by the U.S. Bureau of the Census, based upon 1980 Census data. Due to the estimating methodology the difference between 1988 and 1990 may not be directly comparable. Therefore caution should be used when examining the change between the intercensual figures and the 1990 decennial population. This is particularly true for small population areas.

Note: The Population figures for July 1, 1982 to 1988 are estimates prepared by the U.S. Bureau of the Census, based upon 1980 Census data. Due to the estimating methodology the difference between 1988 and 1990 may not be directly comparable. Therefore caution should be used when examining the change between the intercensual figures and the 1990 decennial population. This is particularly true for small population areas.

Due to the estimating methodology the difference between 1988 and 1990 may not be directly comparable. Therefore caution should be used when examining the change between the intercensual figures and the 1990 decennial population. This is particularly true for small population areas.

Note: The Population figures for July 1, 1982 to 1988 are estimates prepared by the U.S. Bureau of the Census, based upon 1980 Census data. Due to the estimating methodology the difference between 1988 and 1990 may not be directly comparable. Therefore caution should be used when examining the change between the intercensual figures and the 1990 decennial population. This is particularly true for small population areas.

Note: The Population figures for July 1, 1982 to 1988 are estimates prepared by the U.S. Bureau of the Census, based upon 1980 Census data. Due to the estimating methodology the difference between 1988 and 1990 may not be directly comparable. Therefore caution should be used when examining the change between the intercensual figures and the 1990 decennial population. This is particularly true for small population areas.

Due to the estimating methodology the difference between 1988 and 1990 may not be directly comparable. Therefore caution should be used when examining the change between the intercensual figures and the 1990 decennial population. This is particularly true for small population areas.

Note: The Population figures for July 1, 1982 to 1988 are estimates prepared by the U.S. Bureau of the Census, based upon 1980 Census data. Due to the estimating methodology the difference between 1988 and 1990 may not be directly comparable. Therefore caution should be used when examining the change between the intercensual figures and the 1990 decennial population. This is particularly true for small population areas.

Due to the estimating methodology the difference between 1988 and 1990 may not be directly comparable. Therefore caution should be used when examining the change between the intercensual figures and the 1990 decennial population. This is particularly true for small population areas.
